

JUMBO Counterfeit Currency Detection Pen

Counterfeit Currency Detection Pen

The economical and easy way to check most major paper currencies (except Canadian) is with CIS's Jumbo Counterfeit Currency Detection Pen.

To check a bill, simply mark the bill with the patented Jumbo pen. If the ink turns dark brown or black the bill is suspect. These simple instructions are printed on each pen and the pen works specifically on US currency dated after 1959.

Other counterfeit currency detection pens on the market do not perform as well as the original patented Jumbo pen.

First, this pen holds more ink, in fact about 6 times the ink found in competitive pens which will enable this pen to check almost 30,000 bills.

Second, the patented solution used in detection pens can quickly dry out whenever the cap is left off leaving you with a worthless detection device. The Jumbo pen has a redesigned tip that will not allow the whole pen to dry out when the cap is left off. Simply recap and shake the pen to get the ink flowing again.

JUMBO Universal Counterfeit Currency Pen with sleeve

Ink dries yellow or clear on real bill

Ink turns black on suspect bill
